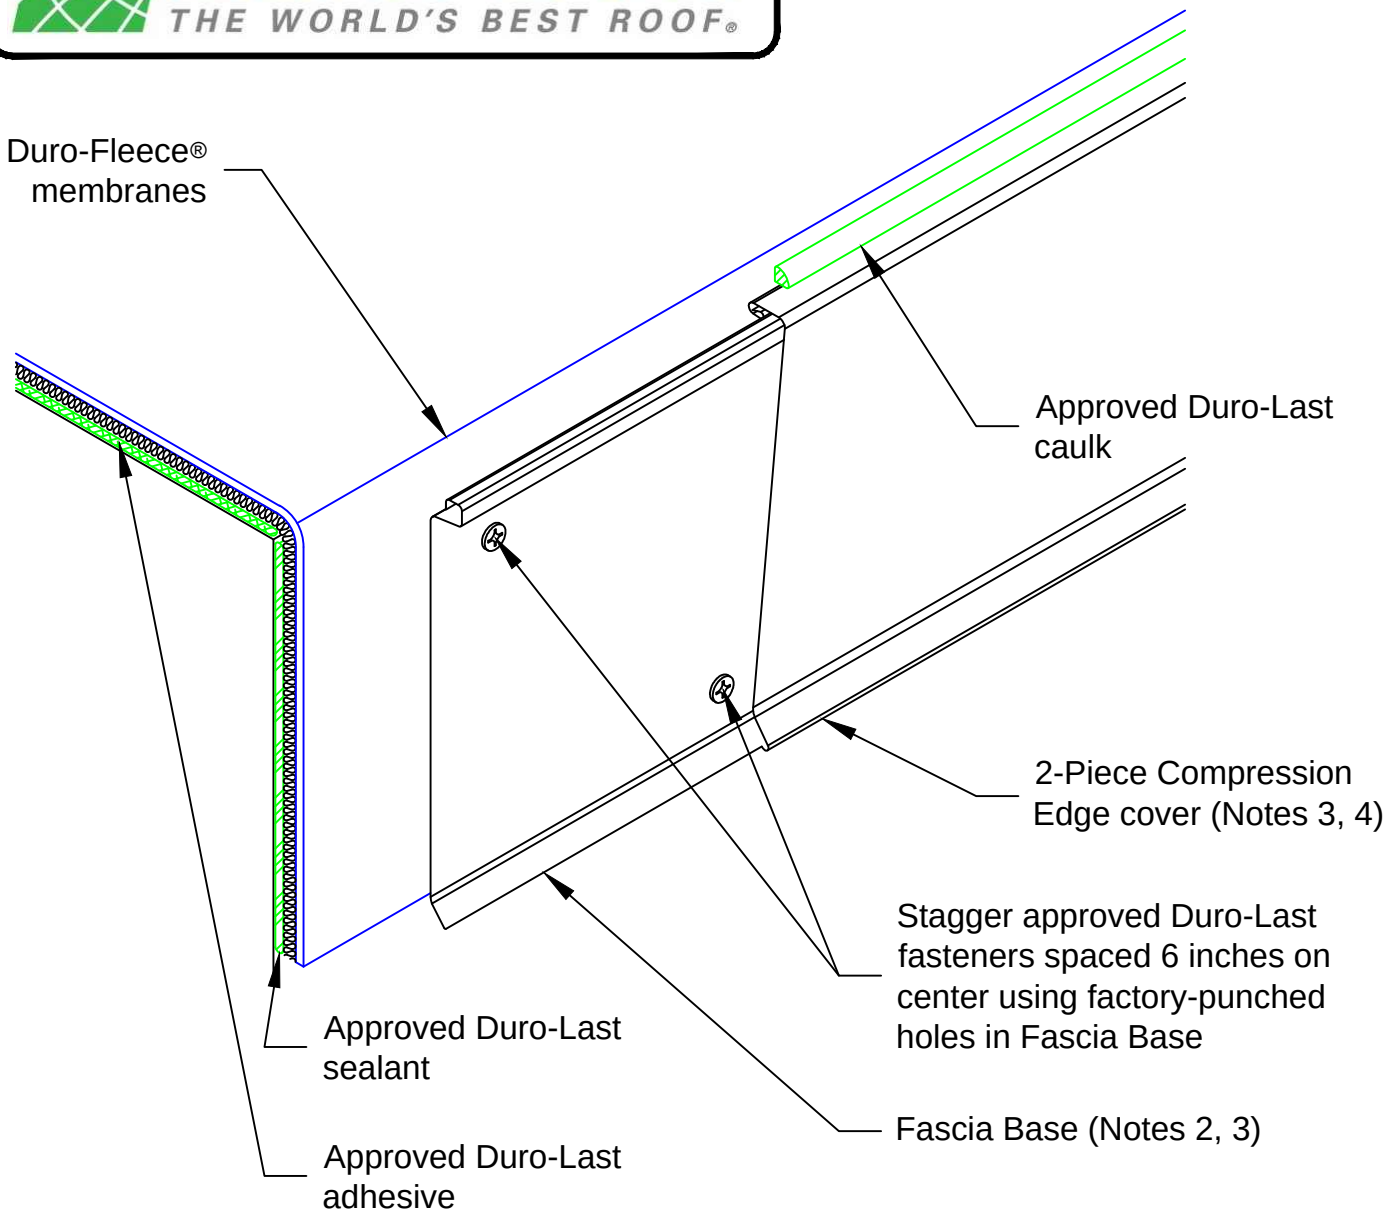
DETAIL DF3560



Note 1: This detail may also be used on parapet walls.

Note 2: A 1/4-inch gap is required between sections of Fascia Base.

Note 3: Joints in Fascia Base must be offset by a minimum of 12 inches from joints in 2-Piece Compression Edge cover.

Note 4: Install adjacent sections of 2-Piece Compression Edge cover over expansion tabs and allow for 1/8-inch gap between overlapping sections. Refer to Detail Drawing 3110.

Note 5: The Fascia System is not to be used as a gravel/water stop. Fascia System and caulk must be located below roof line.
