

Note 1: Contact the Duro-Last® Engineering Services Department for assistance in determining the fastening requirements if: the building is 40 feet tall, or taller; or the building is located in an area with an ASCE 7-05 design wind speed of 110 mph, or higher (150 mph, or higher, for ASCE 7-10); or fastener pullout resistance is less than 150 lb.

Note 2: Refer to RG1062 and RG1064 for fastener placement and sheet overlap.

Note 3: 120-inch fastener row spacing is not acceptable within 7 feet of any perimeter edge.
