

DURO-LAST[®] VINYL-COATED METAL

DESCRIPTION:

Duro-Last[®] Vinyl-Coated Metal has a 17-mil Duro-Last vinyl film laminated to one side of a sheet of 24-gauge, hot-dipped galvanized, grade 90 metal.

The Duro-Last vinyl film allows for easy welding to the Duro-Last membrane when the metal is incorporated into roofing details.

The 4 x 10 ft. (1.2 x 3 m) sheets are available in white, tan and gray and dark gray colors and are only available in palletized sheets of 10. If custom sizes are desired, the sheets can be cut into smaller pieces and will be crated.

Contact the Duro-Last sales department for more information.
